## **2012 AGM**

The 2012 BAA AGM will take place on Thursday 8 November at The Centennial Centre, 100 Icknield Port Rd. Birmingham B16 0AA at 8.00pm.

All BAA members are invited to attend, but in order to gain entrance to the meeting; you must have your current BAA membership card with you (no exceptions). Following the formal business of the meeting, members will receive a report of the goings-on during the preceding twelve months, as well as an opportunity to ask any relevant questions of the Management Committee (at the discretion of the Chairman).

#### AGENDA

- 1. To approve the minutes of the Annual General Meeting held on 10 November 2011
- 2. To approve the accounts for 2011
- 3. To appoint auditors for 2013:

Crompton Ward & Co. - prop. by K Aske

4. Election of officers:

(a) President: Retiring Officer: I P Rees Nominations: I P Rees

Nominated by: S Wyton (F00012), K Aske (S00002)

(a) Vice President: Retiring officer: J N Williams Nominations: J N Williams

Nominated by: P Connolly (F02966) P Binns (S00887)

5. Election of Executive Committee:

Retiring Members: B Collins, F Flint, K Pearson, D Gumbley.

(All re-nominated by Executive Committee)

#### New Nominations: Nominated by:

M Latham (F14426)	D Webb (S00001) T Hanlon (S04606)
L Poulton (F07364)	D Webb (S00001) D Gumbley (F00013)
G Price-Hunt (S04780)	B Marsh (S00009) K Young (S00178)
D Fensome (L00302)	D Webb (S00001) S Hanlon (L00295)
J Flood (S04781)	D Gumbley (F00013) D Jones (S00012)
A Hails (L00267)	M Hails (F11491) D Pickett (F07676)

#### Meeting Closed

Following the conclusion of the formal AGM business, there will then be an open forum when members may raise matters of interest, at the discretion of the Chairman. There will also be Financial, Fisheries and Bailiffing reports presented by Officers, plus a summary of Executive Committee meetings held during the preceding twelve months.

# Fishing News 4

#### **Junior Fishing Day at Coppice**

I was asked to send in a picture of my grandson's (Cameron Preece) catch from the junior angling day at Coppice Lake as one of the members of staff had a camera but couldn't get it to work so I sent in the image. He had a wonderful day.

Here also is a picture of a 4lb 4oz chub he caught at Broadwas that you may also want to use.

Kind regards Martyn Phillips.

Ed; Cameron's Broadwas chub picture is at the bottom of this section. I've also added it to the Fishing News Record list.

Hi,

Just thought I could send in this pic for the monthly newsletter!

This 7.5lb common carp from Coppice Lake was caught on maggots and 4lb line. It put up a great fight! This was caught on the 11th August on the Junior fishing day, on this note can I please thank everyone who organised the event, because it was a great days fishing!

Thanks BAA

Matt Roberts (Age 13)

Ed; as mentioned in the first letter we did suffer camera problems at the Junior Fishing Day and lost over 200 pictures taken. Fortunately one of the other staff members took the pictures below using his phone.

### Cameron's Broadwas chub

#### **Coppice re-opens**

Hi, thought you might like a pic of the 15lb carp caught at Coppice Lake 18/8/2012 plus a pic of lake.

Thanks Kev Abel

#### **More from Coppice**

Hi all went to Coppice on 14<sup>th</sup> August with my mate Colin and what a day we had. We got there about 4am and set up on the car park side of the pool. I'm not telling which pegs or where in the pool we placed our bait or what bait we used but it was a GRRRRRREAT day of fishing.

I totalled 127lb of fish listed it below; Common carp = 17lb, 9.5lb, 11lb, 9lb, 9.5lb, 10lb, 6.5lb, 9lb, 8.5lb, 7.5lb and 10lb. Mirror carp = 7.5lb and 9lb. Bream = 3lb.

Here are 2 photos of the 17lb common carp and a 9lb mirror carp which is beautiful.

Also I think the closure of Coppice has done it the world of good the stories I hear about what some people get up to here with how much bait they are putting into the water to the issue with the litter. Coppice is looking in great shape despite the loss of fish, the grass is lovely and thick on the banks and the water is a lovely colour.

I have a question for you? How is the issue with hot weather and how it affects Coppice going to be managed in the future?

Right now for my mate Colin, what a great day you had mate well done.

He had 108.5lb of fish listed below; Common carp = 11lb, 10lb, 11lb, 10lb, 7.5lb, 7lb, 10lb, 13lb and 10lb. Mirror carp = 11lb. Bream =  $4lb \times 2$ .

Here are some photo of Colin's 13lb common carp and 11lb mirror carp below.

Thanks Kev of Birmingham

Ed: No decisions have been made so far about changes in the management of Coppice Lake. Will keep you updated. What's Colin's surname? I need it for his 11lb mirror carp and 4lb bream entries in the Fishing news record.

#### **Marlcliff** chub

My two friends (Paul and David Wood) have asked me to pass these two photos to you of their two chub.

The 1st is a 6.5lb. The 2nd is a 6.7lb

Thanks Kev of Birmingham

Ed: I've added both fish to the Fishing news record with both Paul and Dave Wood listed as the catcher of both fish. Please email me who caught which fish and I will then correct the list entries. Can you also confirm if 6.5lb and 6.7lb means 6lb 5oz or 6point5lbs. I've assumed 6lb 5oz and 6lb 7oz for the list entries.

#### **Marlcliff bream**

Thought you may be interested in the nice bream caught mid August on the Avon at Marlcliff, not massive but just scraped in at 6lb and a pleasant surprise on an otherwise quite day with just two small perch and a small pike about 4lb. Maggots were the bait with maggot feeder. Looking quite healthy in the photo it was badly scarred with a 4 inch gash on the other side.

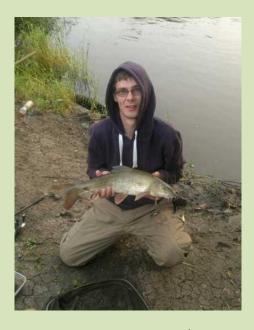

Having fished the stretch many times in the past a cormorant was seen there for the first time, maybe the culprit. It's been good while Coppice has been closed to see species other than carp dominate the news page photos, it does show what is on offer elsewhere.

Thanks,

Graham Beck.

#### **Kevs off fishing again!**

Hi all went over to the River Avon at Marlcliff on  $25^{th}$  July about 8 pegs down from the weir. It was a lovely sunny day had a barbel at 4lb and a chub at 3lb photo's below.

I also went to Nordley on the  $3^{rd}$  August and fished pool 1 had a good day 8 carp in all 1 of which was a mirror carp at 5lb and rest common carp at 7lb, 2 x 5.5lb, 6.5lb, 7lb, 10lb, 11lb and 11.5lb. Photo of the 11.5lb common carp below;

I then went back to Nordley on the  $11^{th}$  August had a great day had 9 carp that day 5 common carp at 6lb, 2 x 7lb, 10lb and 11lb and 4 mirror carp at 4.5lb, 8lb, 10lb and 14.5lb. Below are photos;

Thanks Kev of Birmingham

#### First ever fish

Hello,

Thought you chaps at the BAA would like to see this picture. The picture is of my son Finlay Garner aged 4 years proudly showing off the first ever fish ever caught on his first fishing trip 3 weeks ago, a Roach I think?

This was caught on the canal by The Lock public house in Woverley Nr Kidderminster using a float and maggots within 5 mins of casting out.

We received great advice from Mal himself at Mal Story's in Kidderminster. He told me where to take Finlay what bait to use and what float to use right down to where to cast out to and the depth of the line. You would not get that knowledge and advice from Go-Outdoors or Sports Direct

My son now is truly hooked

This would make a lovely front cover for the next issue of BAA booklet

Kind regards

Hadrian

3<sup>rd</sup> Brian Marsh 14oz 8d

Report from Brian Marsh

## **Nature Views**

#### **Red Kites in the Severn Valley**

We are all used to seeing Buzzards and hearing their distinctive call when fishing the River Severn. It now appears that another large hawk is taking up residence in the valley. The Fisheries Team were at Arley on the 13<sup>th</sup> August, clearing swims on the left bank upstream of the car park. A large hawk was seen flying over the field on the same bank whilst being mobbed by resident rooks from the nearby wood. Its distinctive V tail and red colouring identified it as a Red Kite rather than the usual Buzzard.

If you see Red Kites when fishing at one of our waters, please let us know.

Pictures sourced from Wikipedia.

#### **Unusual birds at Fladbury**

Colin Townsend, one of our bailiffs and a member of the Fisheries Team spotted this strange looking duck at Fladbury.

He checked it out on Wikipedia and identified it as a Muscovy Duck which originates from Mexico, Central and South America. Wild ones in this country have probably escaped from breeders and gone native.

Colin also reported a lone Black Swan which patrols the same stretch of water and when it calls produces quite a unique sound. These swans originate from Australia and have been introduces into ornamental gardens in this country, escapes are quite common.

## **Evesham Festival**

As reported in the August edition, the BAA had a stand at the annual Evesham Angling Festival at Crown Meadows over the August Bank Holiday weekend.

A happy Tombola winner!

The BAA Festival team

The weather was fair, especially on Sunday, the busiest day. The Tombola was a great success attracting many visitors to the stand. We signed up a good number of new members with a Festival special offer of 16 months membership for the price of 12 and had the opportunity to talk to many anglers visiting the Festival.

Hadrian Garner also joined us on the BAA stand to talk to anglers about the dangers of Weils Disease and his product Drweils Hand Sanitiser to prevent infection. A letter from Hadrian is copied below.

#### Dear John

I can't thank you and the BAA team enough for allowing me to go on their stand and talk about Drweils Hand Sanitiser to their members and new sign ups over the three days at the Evesham Festival.

The response from the fishing community was fantastic I had 7 people approach me stating they had suffered from Weils Disease and they stated how glad they were that someone had launched a product to educate those taking risks.

I had particular interest from the youth coaches who look after the young anglers.

May I say that your team made me feel really welcome on the stand and I mucked in as much as I could pulling in the crowd on the tombola.

On the last day I managed to take some pictures of the BAA team on site and hope these will be good for the website.

I will send them in a number of emails due to size

Kind regards

*Hadrian Drweils Ltd* 07896670582

#### **Midland Angler**

Copied below is an extract from the Midland Angler, the forerunner to the BAA News.

March 1948 edition

### Cupping the Ground-bait

by Captain L. A. Parker

THIS is a method often successful when all other methods fail, and can be employed under any conditions of water or weather. Although recommended for float-ledgering, it can be used for any style of ledgering provided the ground-bait is made stiff enough to withstand the strain of a long cast.

The usual method of ground-baiting when ledgering is to pinch some either round the shot of your float tackle or on the lead if ledgering in the usual manner. This method is quite all right, but we can go one better. In the first place, the idea of putting ground bait on the shot or ledger is to attract fish to your bait, so why not attract them to the very spot where your bait lays, by putting it round the bait, or partially so.

We all know how readily fish feed on groundbait and I have proved to my own satisfaction with the aid of a water telescope, that nine times out of ten fish start feeding on the ground-bait first. Hence the importance of having your bait near to it.

Cupping the ground-bait is a very simple process. First you make up a small ball about the size of a walnut and pinch it round the gut of the hook length. Then press your finger into it at the end nearer the bait and so make a hole or cup, so to speak. Now run the ground-bait down on to the bait, when it will be partially hidden from view. Do not use stiff ground-bait, but keep it as light as conditions of water will allow.

You now have things as they should be, the fish are attracted to your ground-bait, start feeding on it, and quickly discover a more tempting morsel which they invariably go for instead of continuing to feed on the ground-bait. In any case, your chances of catching fish are much better because you have attracted them to the "exact spot."

I used this method as a lad and do so today whenever I am float fishing from the bank and about to have my lunch. I push my float up eighteen inches or so, on with a piece of crust or paste and groundbait cup, and into the water it goes. This must be a gentle action and in the right spot, because you do not want to drag

the ground-bait along the bottom and so remove it from the bait. I have had my lunch in discomfort many times when fishing this way and also when I have decided to give swimming a rest—may you be treated likewise.

When the river is in flood is also a favourite time of mine to use this method. I walk along the bank trying all the shallow lay-byes, first with crust, then with worm or paste, but always using the cup ground-bait. I have been astounded many times by the ferocious nature of the bites and the number of fish caught.

The reason for this is undoubtedly due to the fact that fish start feeding on the ground-bait and continue to do so because nothing disturbs or happens to them. They have fed on it many times before, their suspicion is allayed, and finding a far more attractive bait in the centre, they take it with gusto. Stiff ground-bait on the hook is also very deadly when fishing this way.

#### Fish Migrations.

During the summer of 1947, an investigation of the migrations of salmon and sea-trout was carried out by the Ministry of Agriculture off the mouth of the Yorkshire Esk at Whitby. 66 fish were netted and released alive after a distinctive mark consisting of a small celluloid tube containing a slip of paper with instructions as to the return of the marks had been attached to the dorsal fin by a loop of silver wire.

Since then, fifteen fish or their markings have been returned. Of the recaptured fish, nine were taken within two miles of the place of marking after varying periods of liberty. The remaining five travelled greater distances. Three were accounted for off the Northumberland coast some seventy miles north of the marking station, one—a sea trout—was taken by rod and line in the Coquet and the other was found in a tributary of the Tweed on December 13th, 1947, over five months after being marked. Further experiments this summer will, it is hoped, lead to a fairly clear picture of the migrations of salmon and sea-trout.

## Fisheries Report §

The Fisheries Work party has carried out work at the following fisheries since the last edition;

#### **River Avon**

#### **River Teme**

Charlton 4, 5, 6 & 7 Fladbury down stream Eardiston Mill downstream of car park

#### **River Severn**

Arley LB 3, 4, 5 & 6 Quatford 1 & 2 Ribbesford downstream of car park by football ground Ripple and Birds Meadow

We have been slowed by the rain in August having to abandon completion of the downstream end of Ribbesford and upstream of the car park at Eardiston Mill.

If you have any items, thoughts, issues you want to air in the BAA news, please email it to <a href="mailto:baajnw@btinternet.com">baajnw@btinternet.com</a> titled for attn of BAA News Editor.

When sending in a comment can you please let us know if you don't want your name included?

The Editor will act as moderator for items to be included.

Wednesday spent most of the day fishing on the surface; catch consisted of five carp up to 16½lbs, one of which was a 12lb mirror. All were in good condition no damage found. Condition of the lake very good no litter to be seen. Another good day at Coppice thanks to you all at BAA for sorting the problem.

red Jones			

I read the news reports on here every month with great interest, and a while back some kind soul posted all the sat nav directions for all the fisheries. Now being useless when it comes to finding these venues I thought what a god send that is! But now looking for this post to print it off I can't find it would you be good enough to e mail it or re print it again in next months news reports.

Thanks in advance David Harley

Ed; satnav info' re-copied below.

# "You have reached your destination"

#### **Fisheries Satnav guide**

In recent editions of the Guide to Waters and on the BAA website 'Where to fish' pages, Ordnance Survey National Grid Reference Coordinates have been included for all our fisheries except canals. These are provided for anglers to quote if they need to make a 999 call from a fishery to enable the emergency services to locate them.

The table below includes all the BAA Ordnance Survey National Grid Reference Coordinates with their equivalent Latitude and Longitude values. The conversion was done using the following website;

http://www.movable-type.co.uk/scripts/latlong-gridref.html

My thanks to Chris Veness who created the website.

Most satnav devices accept Latitude/Longitude inputs, so you can now use your satnavs to guide you to our fisheries.

Some of our fisheries have more than one car park; the list below only provides a satnav Lat/Long reference to the car park associated with the OS reference. So if you visit one of our other fishery car parks and have your satnav with you, record its' Lat/Long reference and email the information to the BAA. I can then add it to the list and provide regular updates (that's why I've included a version number).

A small word of caution, I used my satnav when visiting Stanley fishery on the Severn (Guide page 44). As the OS reference is for a location about a ½ mile from the road down a farm track, my satnav could not plot a direct route as it does not hold a map of the track. It plotted a route to the other bank and then crossed the river where no bridge exists. In this and similar cases I will update the list with a satnav reference for the access point to the car park on the public highway.

If you find any problems or have additional Lat/Long references you want added please let us know?

## **Dave Harrell Tactics**

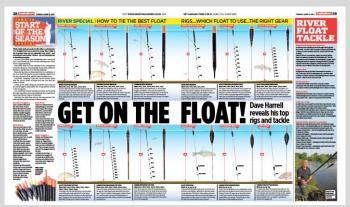

Angling I www.cofishinc.co.uk
REST FOR NEWS. REST FOR DEALS.

Dave Harrell and the FIRST FOR NEWS, BEST FOR DEALS have kindly given us permission to republish his articles in the BAA News. They should be of particular benefit for those fishing the River Severn.

As the articles are formatted for the Angling Times which is a larger format than the BAA News, copying them into this magazine results in a significant loss of detail. I have therefore provided hyperlinks to a PDF of each article stored on Dave Harrell's website (hyperlink below);

#### http://www.daveharrellangling.com/

To access the articles Ctrl + Click on the selected hyperlink beneath each article thumbnail below. You will need to have your computer connected to the internet to do this. You can then increase the viewing size of the downloaded PDF using either your browser or Adobe Reader controls.
